It's All In The Brand

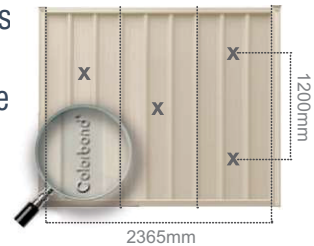

## TWO GREAT BRANDS

in partnership with

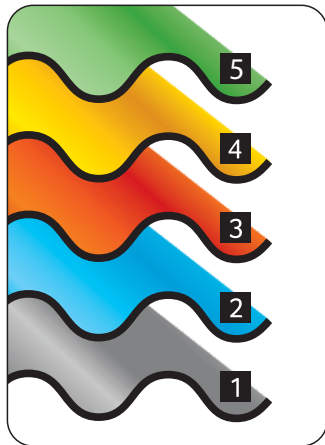

Make sure you're buying the real thing, look for these brands. Not all coloured steel fencing is made with COLORBOND® Steel. Only at Our Town Fencing can you be sure you're getting what you paid for. FENSCREEN® Panels are made from COLORBOND® Steel and branded with a subtle laser engraving (on both sides of the fence) at least three times over the 2.36 metre fence section. All packaging carries the Our Town Fencing logo so that you can be sure you're buying from the Leading Fencing Manufacturer using only premium COLORBOND® Steel.

## Why Are FENSCREEN® Panels So Tough?

Our panels are made from genuine COLORBOND® Steel made in Australia from start to finish using an advanced 5-step process to ensure it stands the test of time in Australia's harsh conditions. **It's all about how it's made:**

1. The structural steel core base is made to meet Australian Standard AS 1397, ensuring strict adherence to the highest quality grade and finish of your steel
2. The steel base of the fencing panels is coated with Activate™ technology, BlueScope's industry-leading metallic coating that enhances anti-corrosion performance
3. A thin pre-treatment layer is applied to enhance the adhesion of further coatings
4. A polyester primer is baked onto the surface
5. A topcoat of specially developed exterior grade lead-free paint (compliant with Australian Standard AS 2728) is baked on for enhanced resistance to chipping, peeling and cracking and to ensure the finish retains its look for longer

## Benefits of FENSCREEN® Panels

- The  FENSCREEN® panel fencing system uses only quality COLORBOND® Steel
- Looks great from both sides
- Wont be eaten away by insects or vermin
- A great fire resistant privacy screen & secure barrier for around your property
- Backed by BlueScope Steel's 10 year warranty. Refer to Our Town Fencing's "We Care" policy for maintenance & warranty details
